Kruidvat

eeltsokken
chaussettes anti-callosités

MET LAVENDELGEUR AVEC ODEUR DE LAVANDE

ONE SIZE FITS ALL

VOOR ZIJDEZACHTE VOETEN
POUR DES PIEDS ULTRA-DOUX

snel en effectief bij eelt
rapide et efficace en cas de callosités

Kruidvat

NL Kruidvat eeltsokken zorgen voor zijdezachte voeten, al na 1 behandeling! Door Kruidvat eeltsokken gedurende 60 minuten te dragen voelen voeten direct zachter aan. De speciale gel maakt overtollige, harde huid direct los. Het vernielt de aanmaak van nieuwe huidcellen wat zorgt voor heerlijk zachte voeten.

GB Les Chaussettes Anti-callosités de Kruidvat procurent des pieds ultra-doux dès la 1^{ère} utilisation ! Après 60 minutes de port, vos pieds deviennent tout doux. Le gel spécial élimine directement l'excès de peau morte. Ceci accélère la production de nouvelles cellules de la peau et rend les pieds agréablement doux.

Gebruiksaanwijzing:

- 1) Verwijder alle nagellak (gekleurd of transparant). Reinig en droog de voet, haal de sok uit de verpakking en knip de sluiting open.
- 2) Steek de voet in de sok, en zorg daarbij dat de gel de huid overal raakt. Trek de rode, dubbelzijdige strip los en plak de opening van de sok dicht (door er gewone sokken overheen te dragen wordt de gel dicht tegen de huid gedrukt).
- 3) Draag de sok gedurende 1 uur.
- 4) Was de voeten met warm water om de resterende gel te verwijderen.
- 5) Na 9-7 dagen vallen de harde huidstukjes er geleidelijk af. Dit vervel-proces kan ongeveer 1-2 weken duren*. Er kan veel huid loskomen, maar dat is normaal. Probeer de huid niet zelf los te trekken gedurende deze periode.

Modes d'emploi :

- 1) Enlevez tout vernis à ongles (coloré ou transparent). Nettoyez et séchez les pieds, sortez la chaussette de l'emballage et coupez-la pour l'ouvrir.
- 2) Enfilez la chaussette et assurez-vous que le gel se répartit sur toute la surface du pied. Tirez la double bande rouge pour la détacher et collez l'ouverture de la chaussette pour la fermer (en portant des chaussettes normales par-dessus les chaussettes anti-callosités, le gel est comprimé contre la peau).
- 3) Portez la chaussette pendant 1 heure.
- 4) Nettoyez les pieds à l'eau chaude afin d'enlever le reste du gel.
- 5) Au bout de 9 à 7 jours, la peau morte se détache progressivement.

Ce processus peut durer environ 1 à 2 semaines*. Il est possible qu'une quantité importante de peau se détache; cela est toutefois normal. N'essayez pas pendant cette période de tirer sur la peau pour la détacher.

* Pour un meilleur résultat prendre chaque jour un bain de pieds dans de l'eau chaude.
